GlycoMark Updates for Healthcare Professionals Caring for Patients with Diabetes

DIABETES MANAGEMENT

Issue 13 - November 2018

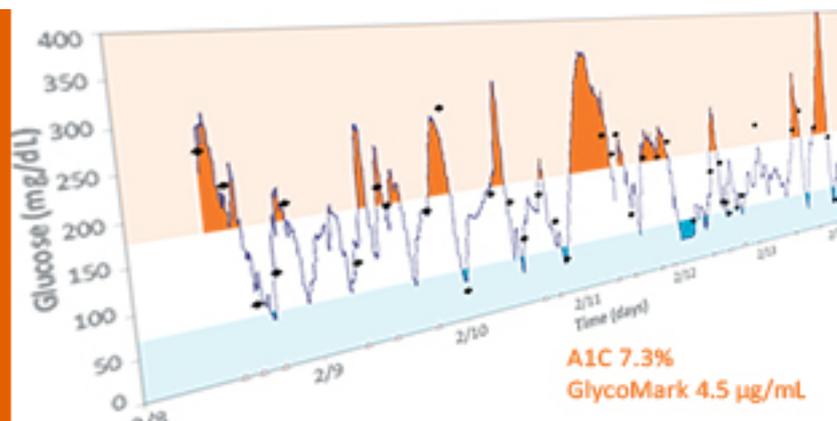

Dear Clinician,

November is National Diabetes Month and an **ideal opportunity** to try **new methods** to enhance the management of patients with diabetes.

The GlycoMark test is one of those methods. **Here's why:**

Nearly 40% of patients with diabetes benefit from the GlycoMark test. That's because nearly 40% of patients with a good to moderately elevated A1C may experience significant postprandial hyperglycemia or glycemic variability.^{1,2}

The GlycoMark test:

- Complements A1C and provides shorter-term visibility to glucose variability and excursions that sporadic blood glucose and quarterly A1C cannot detect.
- Helps identify patients that would benefit from closer management, including ...

The Mark newsletter is distributed to healthcare professionals that treat and manage patients with diabetes, and contains the latest updates and important references for the GlycoMark test. This is a complimentary publication provided through the generous support of GlycoMark, Inc.

The information contained herein is not medical, diagnostic or treatment advice for any particular patient. Physicians should use their clinical judgment and experience when deciding how to diagnose and treat patients and in the use of the GlycoMark test in the treatment of the patient. Please refer to the GlycoMark product insert for more information.

The GlycoMark test is FDA cleared for professional use to provide quantitative measurement of 1,5-anhydroglucitol (1,5-AG) in serum or plasma. The GlycoMark test is intended for intermediate-term monitoring of glycemic control in patients with diabetes. It is not intended to be used to identify patients that will experience complications of diabetes or the likelihood of experiencing complications.
